

DermLite Connection Kit for iPhone 4 / 4S

Finally, you can use the functional power and optical beauty of the DermLite you already know & own to take digital images with your iPhone by sliding this exclusive case to your iPhone 4 / 4S and threading the 28 mm adapter ring onto your DermLite II or DLIII.

Conveniently, the DermLite iPhone case leaves all iPhone jacks and buttons accessible and is no bulkier than most consumer-grade cases. Add its superior scratch and impact protection to the list of reasons why you can keep it attached to your iPhone all the time, even when you are not doing dermoscopy.

To disconnect the two simply unscrew the DermLite or slide the phone from the case.

Each DermLite Connection Kit for iPhone 4 / 4S comes with 3Gen's 5-year warranty, includes an iPhone 4 / 4S snap case and 28 mm adapter ring.

Compatible with iPhone 4 / 4S, any DermLite II or DL3.
